Brad,  
Maybe you can have Chase take a look to see if there is an easy fix on your side. If not, I can submit the hardcopy and get it uploaded (I think)...I am out of the office for a few days but let's work to get this resolved...

We thought we had it in the database two weeks ago. I'm not sure what's really going on.

Perfect...Is this in EPA's database presently? Or, do I need to get it added to our database?

Dirk,

I'm hoping this is what's needed.

Thanks,

Brad,  
The Bonner County PDMP looks fine and is exactly what we'd expect, so thanks for providing that information.

But, the 2014 Annual Report still needs to be updated, it is basically blank. There are 2 options for you: 1) go into EPA's data base and make the corrections to include all pesticide applications made to waters of the U.S. during the 2014 year; or 2) fill out a hardcopy of the annual report with the necessary pesticide application information, scan the report, e-mail it to me, and I will update EPA's database with the new information.

Best,

Dirk,

I've used a more recent format to address the concerns of my reporting for 2014. I hope this has filled those voids. There's been employee changes in Bonner County. Our current public works director was not here in 2014 so possible signature requirements are left out. I hope this satisfies the attempt to update this file. I'll wait for your correspondence to do any further work on this document.

Thank you,  
Brad Bluemer
